

# Diffusion

Axel Pontén

May 11, 2025

Code is found at <https://github.com/axel-ponten/advanced-deep-learning-VT25/tree/main/diffusion>

I implemented a diffusion network from the template. I only had time to run 3 epochs due to a conflict of time between start of training and exercise submission deadline. I'm surprised how well it's doing after so short though! However I did accidentally not use the test set whatsoever... I do not have to time to fix and retrain before deadline.
